

SELF-CHARGING HYBRID

UX 300h

GET READY TO FEEL MORE

HAND-CRAFTED IN JAPAN, THE UX 300h EXCITES
WITH EVEN MORE HYBRID POWER AND REASSURES
WITH THE LATEST LEXUS SAFETY SYSTEM +.

Driving the UX 300h luxury compact, you're surrounded by technical achievements, from the new-generation Lexus Self-Charging Hybrid to the ultra-rigid chassis and breakthrough Lexus Safety System +. Showcasing the very latest Lexus technology, we worked tirelessly to give this luxury SUV even more electrifying appeal. Adding zest and excitement to the UX range, the F SPORT Design and F SPORT feature a bold front grille and an extended bi-tone roof.

MORE POWERFUL, MORE EFFICIENT, MORE FUN

The UX 300h's new Lexus Self-Charging Hybrid¹ technology combines a super-efficient 2.0-litre petrol engine with high-output electric motor(s) increasing system power to 199 DIN hp. The UX 300h boasts excellent fuel economy and EV driving feel, yet with no range issues. Acceleration is now more rapid and smoother, thanks to a newly developed lithium-ion battery which is lighter yet more powerful.

TECH IN YOUR HANDS

An enhanced E-FOUR system with a new 30 kW rear electric motor, over five times more powerful than the current unit, improves road holding and performance in tough conditions. For more control, a new shift-by-wire mechanism offers pleasant and quick operation.

SUPER-SHARP COLOURS

You can opt for vivid colours and our deep-lustre sonic finishes for your UX. The F SPORT and F SPORT Design versions can now be specified in several colour options, including the new Sonic Copper, with a contrasting black roof now also extending to the pillars. Black roof rails, black shark fin antenna and roof spoiler make for an undeniably distinctive look.

TAKUMICRAFTSMANSHIP, NEW LEATHER-FREE OPTION

The leather upholstery available on the UX is inspired by 'sashiko', a traditional Japanese quilting technique used in the making of martial arts uniforms. The quilted leather is decorated with perforation patterns that form mathematical curves and gradations in perfect alignment, enhancing the appearance of the seats. A leather-free interior is now available in both fabric and Tahara trim.

ENHANCED LEXUS SAFETY SYSTEM +

The latest UX benefits from the advanced active safety and driver assistance systems featured in the latest generation Lexus Safety System +, with upgraded and additional functions offering increased accident risk detection. Driver Monitor checks drivers for signs of fatigue or distraction while Proactive Driving Assist controls brakes to help keep a safe distance from road users and objects ahead, adjusts the steering assist force to facilitate safe and precise handling.

SAFE EXIT ASSIST

With visual and audible alerts, the exclusive Safe Exit Assist function on the UX equipped with Blind Spot Monitor warns driver and front and rear passengers against opening their door in the event of traffic approaching from the rear.

THE BIG PICTURE

The UX is enhanced further with a new 12.3" fully digital instrument display. The layout and prominence of the meters and information change according to the drive mode selected and can be customised. Projecting in colour directly onto the windscreen, the Head-Up Display lets you check navigation, safety features, information and audio settings without taking your eyes off the road.

NEW SMART DIGITAL KEY

One less thing to misplace, our secure and convenient Smart Digital Key² integrates all Lexus smart key functions into the Lexus Link + app on your smartphone. Kept in your pocket or bag, it lets you smoothly unlock/lock and start your car and can be shared remotely between up to five people.

¹ Combined engine and electric motor(s).
² The fuel consumption and CO₂ values are measured in a controlled environment on a representative production model, in accordance with the requirements of the new WLTP European Regulation EC 2017/1151 and its applicable amendments. For each individual vehicle configuration, the final fuel consumption and CO₂ values may be calculated based on the ordered optional equipment. The fuel consumption and CO₂ values of your vehicle may vary from those measured or calculated values, as driving behaviour as well as other factors (such as road conditions, traffic, vehicle condition, tyre pressure, load, number of passengers, etc.) have an influence on a car's fuel consumption and CO₂ emissions. For more information regarding the new WLTP test method, please visit: www.lexus.eu/wltp#nedc
All technical figures, including CO₂ emissions and fuel consumption are target values subject to homologation.

All figures listed are preliminary, tentative values subject to change without notice. Specifications shown in this brochure are based upon the latest available information at the time of printing. Further technical data, including any updates, can be found at www.lexus.eu.

¹ Combining the power of a highly-efficient petrol engine and electric motor(s), Lexus Self-Charging Hybrids charge themselves while you drive, slow down or brake, meaning you never have to plug them in or worry about battery range. Learn more: www.lexus.eu/hybrid
² The engine start function of the Smart Digital Key will not operate if your vehicle is equipped with an additional immobiliser device and the immobiliser key is not present inside the vehicle.

DISCOVER MORE ONLINE

Find out more about the UX online. Take time to explore which equipment grade best suits your lifestyle and learn about our world-class service and finance offerings. If you're interested in how the UX feels to drive, you can book a test drive with your local Lexus Retailer.

Taking care of the environment is a priority for Lexus. We take many measures to ensure that during the lifecycles of our vehicles - from design, production, distribution, sales and service to end-of-life - their environmental impact is minimised. Your retailer will be happy to provide more information on end-of-life vehicle requirements.
